connected (12)

Quiz Questions:

Explain: Data Communication & Computer Network Tutorial

About the Tutorial

Data communications refers to the transmission of digital data between two or more computers

Explain: A computer network or data network is a telecommunications network that allows computers to exchange data

Explain: The physical connection between networked

computing devices is established using either cable media or wireless media

Explain: The best-

known computer network is the Internet

Explain: This tutorial should teach you basics of Data Communication and Computer Network

(DCN) and will also take you through various advance concepts
